SUMMARY

- ✓ IT industry experience around 7+ years of experience in Software Development with Core Java (oops, exception handling, collections, multi-threading) and Java8.
- ✓ Expertise in J2EE web application development with the following technologies such as **REST** full web services, good knowledge on **Spring MVC, Spring Core, Spring Data, Spring Boot and Kafka.** .
- ✓ Hands on experience in mapping relational model using ORM framework **Hibernate.**
- ✓ Having working knowledge in **JDBC, Servlet, Struts and JSP pages**
- ✓ Hands on experience in **HTML, JavaScript and React Js**
- ✓ Experience in preparing project documents such as technical design documents, Functional Requirement Specification, and test cases for applications development.
- ✓ Excellent Back-End RDBMS Skills using SQL in Database like **MYSQL**
- ✓ Hands on experience with **Micro Services** and **AWS**
- ✓ Good Knowledge on AI Tools like GitHub Copilot and Microsoft Copilot
- ✓ Hands on experience in using Spring Tool Suite (STS), IDE Eclipse and IntelliJ
- ✓ Quick learner and excellent team player, ability to meet deadlines and work under pressure.

EDUCATIONAL QUALIFICATION

- ✓ I pursued my Master of Science in information Technology (MSIT) from International Institute of Information Technology, Hyderabad.
- ✓ B. Tech in Electronics and Communication Engineering from Jawaharlal Nehru Technological University, Hyderabad with 70 % (2010-2014).
- ✓ Intermediate (MPC, 2008-2010) – Board of Intermediate, AP with 76.5%.
- ✓ Secondary School Certificate from Board of Secondary Education, AP With 80.2% (2008).

TECHNICAL EXPERIENCE

Operating Systems	Windows
Languages	Java, HTML, XML, JavaScript, React JS
Data Base	SQL Server, My SQL
Frame Works	Spring, Spring Boot.
Debugging Tools	Jenkins
Servers	Tomcat
Editors	Eclipse, IntelliJ
Web technologies	Servlets, JSP
ORM Tool	Hibernate
Testing Tools	Junit, Mockito
AI Tools	Microsoft copilot, GitHub copilot
Management Tools	Jira, Confluence, Ops Genie
Version Control Tools	Git Hub

PROFESSIONAL EXPERIENCE

Project #1:

Project Name: Property Ware.

Duration: January 2022 to July 2025.

Company: RealPage India

Role: Software Developer.

Tools Used: Spring Mvc, Jsp, IntelliJ, MySql, Maven, Jira, Hibernate, JQuery, JavaScript, Spring Boot, Spring Cloud, Html, AWS, Copilot

Description:

Propertyware is a property management software designed to help property managers and landlords streamline their business operations. It offers features such as online rent payment processing, maintenance request management, lease tracking, accounting, and reporting tools, tenant, and owner portals. Overall, Propertyware aims to simplify property management tasks, improve communication with tenants and owners, and enhance overall efficiency of property management operations.

Responsibilities:

- Attending Daily Standups.
- Attending product calls and helping the product in analyzing the requirements.
- Troubleshooting application.
- Interacting with other teams If required.
- Worked On New Requirements.

Project #2:

Project Name: DocX.

Duration: January 2020 to January 2022.

Company: Agility E Services

Role: Software Developer.

Tools Used: Spring Mvc, ReactJs, MS SQL, Jenkins, Maven, Jira.

Description:

DocX is an application Used to transfer documents in three modes of communication like Email, ftp and unc, Documents Will be transferred to the user based on matching rule.

Responsibilities:

- Gathering requirements from the user.
- Involved in release, Deployment.
- Troubleshooting application in production environment.
- Interacting with the user to understand the issues.
- Worked On New Requirements.
- Developing user guide, Test case and FRS document.

Project 3:

Project Name: Cscts

Duration: March 2019 to July 2019.

Company: Tavant Technologies.

Role: Software Developer.

Tools Used: Core Java, Spring Boot, Rest API .

Project Description : Cscts is a java-based web application designed to monitor, manage, and optimize coal mining operations across various stages of the mining life cycle

Role & Achievements:

- ✓ Attending daily scrum calls and updating the status.
- ✓ Developed Rest Apis.

Project 4:

Project Name: NetDiscoveryEngine.

Duration: July 2017 to February 2019.

Company: Velankani.

Role: Software Developer.

Tools Used: Core Java, Redmine, Svn, Eclipse, spring core, MySQL.

Project Description: Network Adapters read each network element and extract the physical and logical inventory, pulling the data into a single, network topology view.

Role & Achievements:

- ✓ Attending daily scrum calls and updating the status.
- ✓ Understanding the functional specifications and Requirements of the application.
- ✓ Written services for SNMP protocol for fetching data from network elements using spring and storing data in database using hibernate.
- ✓ Worked on Jenkins, created a Jenkins pipeline and worked on maven build tool.
- ✓ Wrote a Testing Framework in Order To validate the attributes of a XML device response using Jaxb, TestNg, Jxpath and Reflection concepts.
